What is an Apple ID?

If you already use an Apple device, you already know your personal Apple ID. apps from the Appstore. It also oûers you convenient functions, such as 5GB automatically backing up your device or synchronising your apps and photos

What is a Managed Apple ID?

The Managed Apple ID oûers all of this, but you can't use the App Store or in apps available on your device are determined by your school. You have 200G iCloud. The managed Apple ID is designed so that you can separate private a avoid monthly costs for the iCloud. At the same time, the Managed Apple ID protection if your school provides you with a managed Apple ID available to you.

However, it is mandatory to provide a mobile phone number. This mobile phon your work or school content if you forget your password for your Managed Ap mobile phone number is a second factor that prevents others from gaining ac your password becomes known. If you are a student, you should not store you that of your parents. You will then always need the help of a parent to restor worst comes to the worst, but you will not disclose any personal data.

Step 1: Set up your Managed Apple ID

You have received access data from your school. These consist of an e-mail mustermann@appleid.ca-mad-ga.de and a password (5 yes).

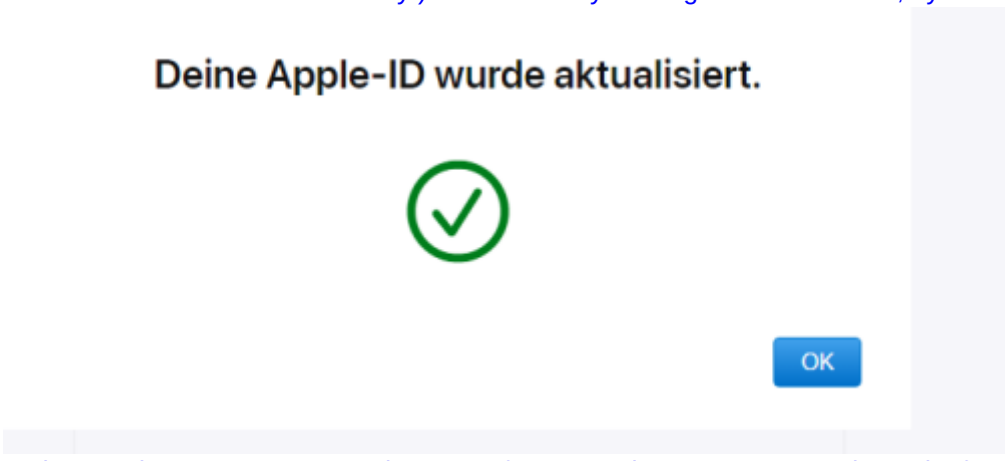

Visit the website https://school.apple.com. You must use Chrome, Chromium, Safari or Edge. browser does not work.

Enter the e-mail address in the Apple ID û eld and the password in the Pass
provided by your school.

Now you need to enter your mobile phone number - if you are a student, it is
parent who is currently helping you with the setup. Click on Continue after
number. You will receive a text message with a code that you must now enter

Click on Conû rm . In the next step you have to assign yourself a new passwo
password that your school sent you with the access data.

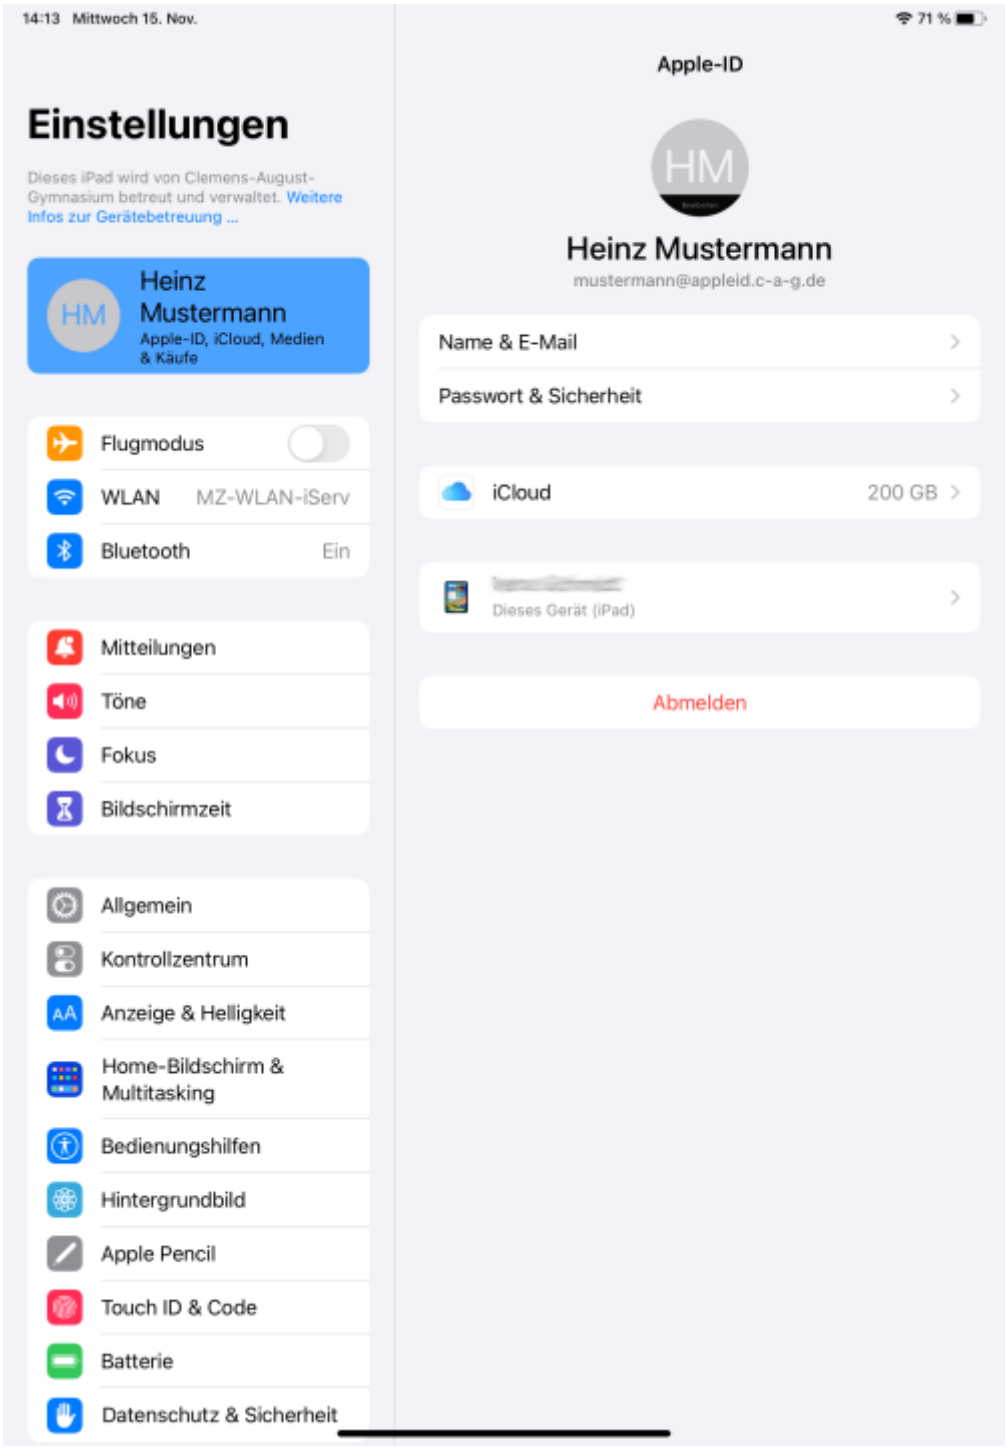

Then click on Change password . Please remember your password well! (You
number to reset it if necessary). If everything went well, you will see this dia

Click on Ok - then you are done after a data protection information. Howeve

there will be hardly any personal data.

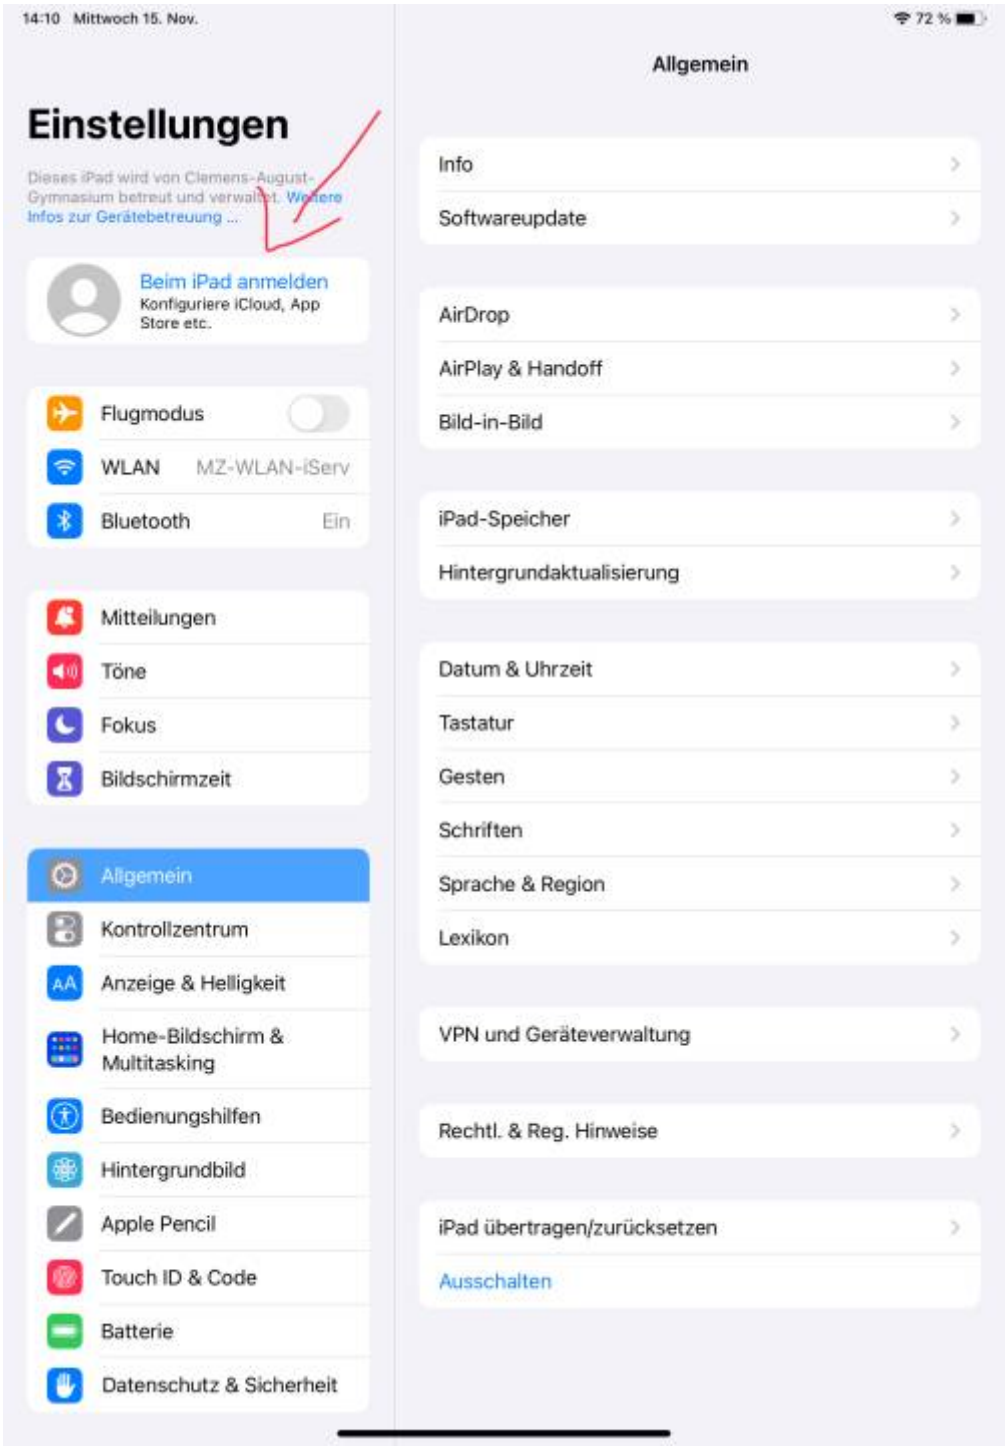

Step 2: Sign in on your iPad with your managed Apple ID

You will need the access data you have just created. These consist of an ema
mustermann@appleid.c-a-g.de and the password you set at the end of step 1.

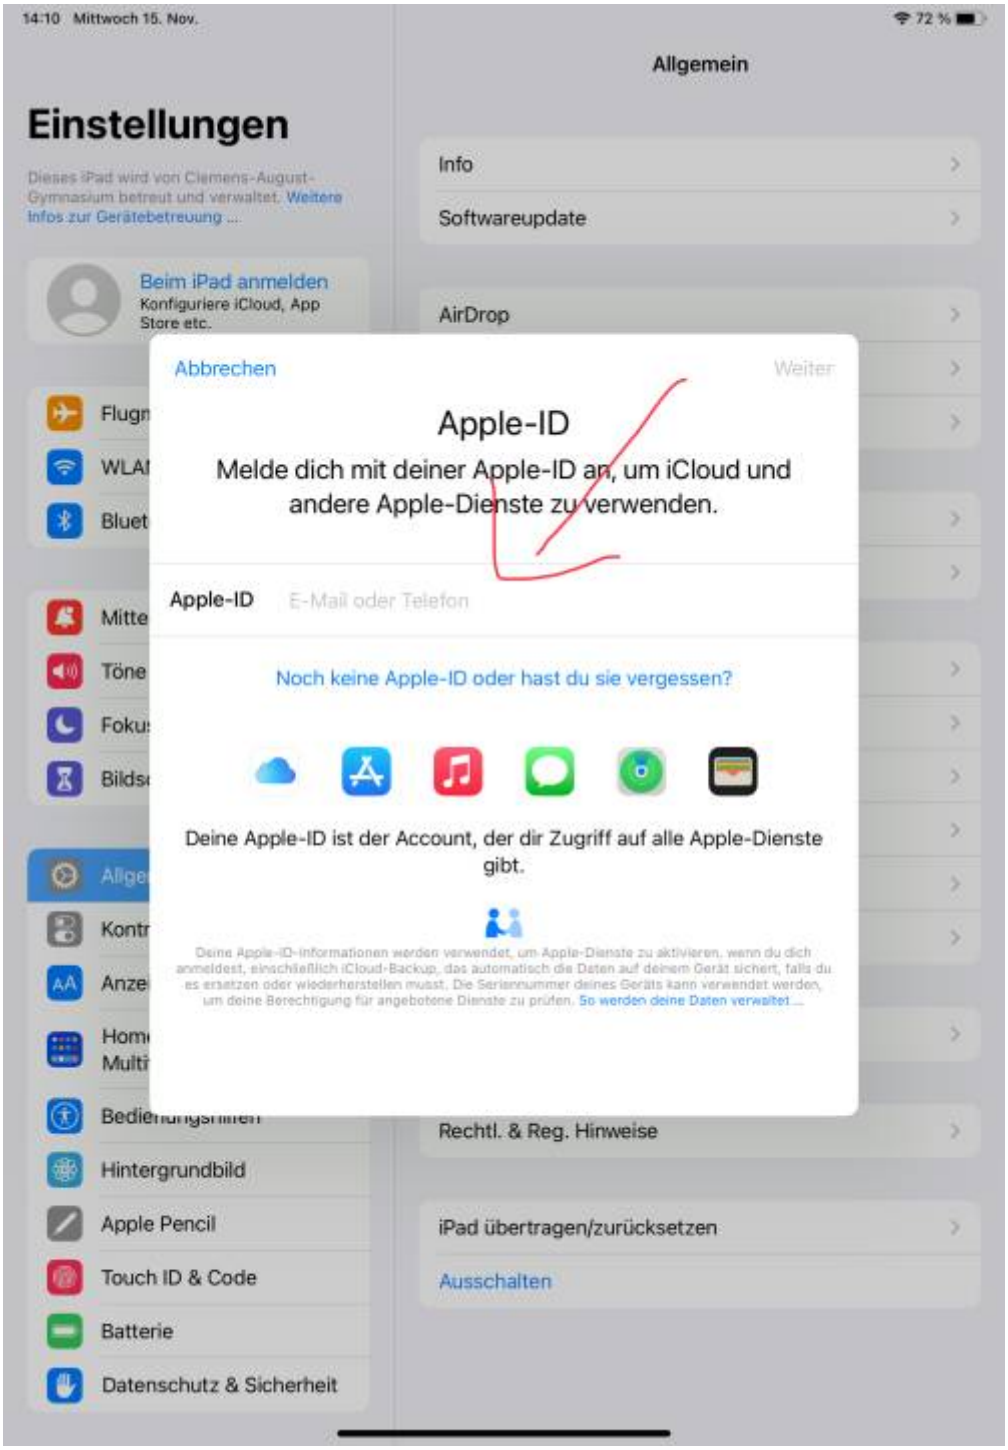

Go to the settings on your iPad:

Tap Log in to iPad in the top left-hand corner:

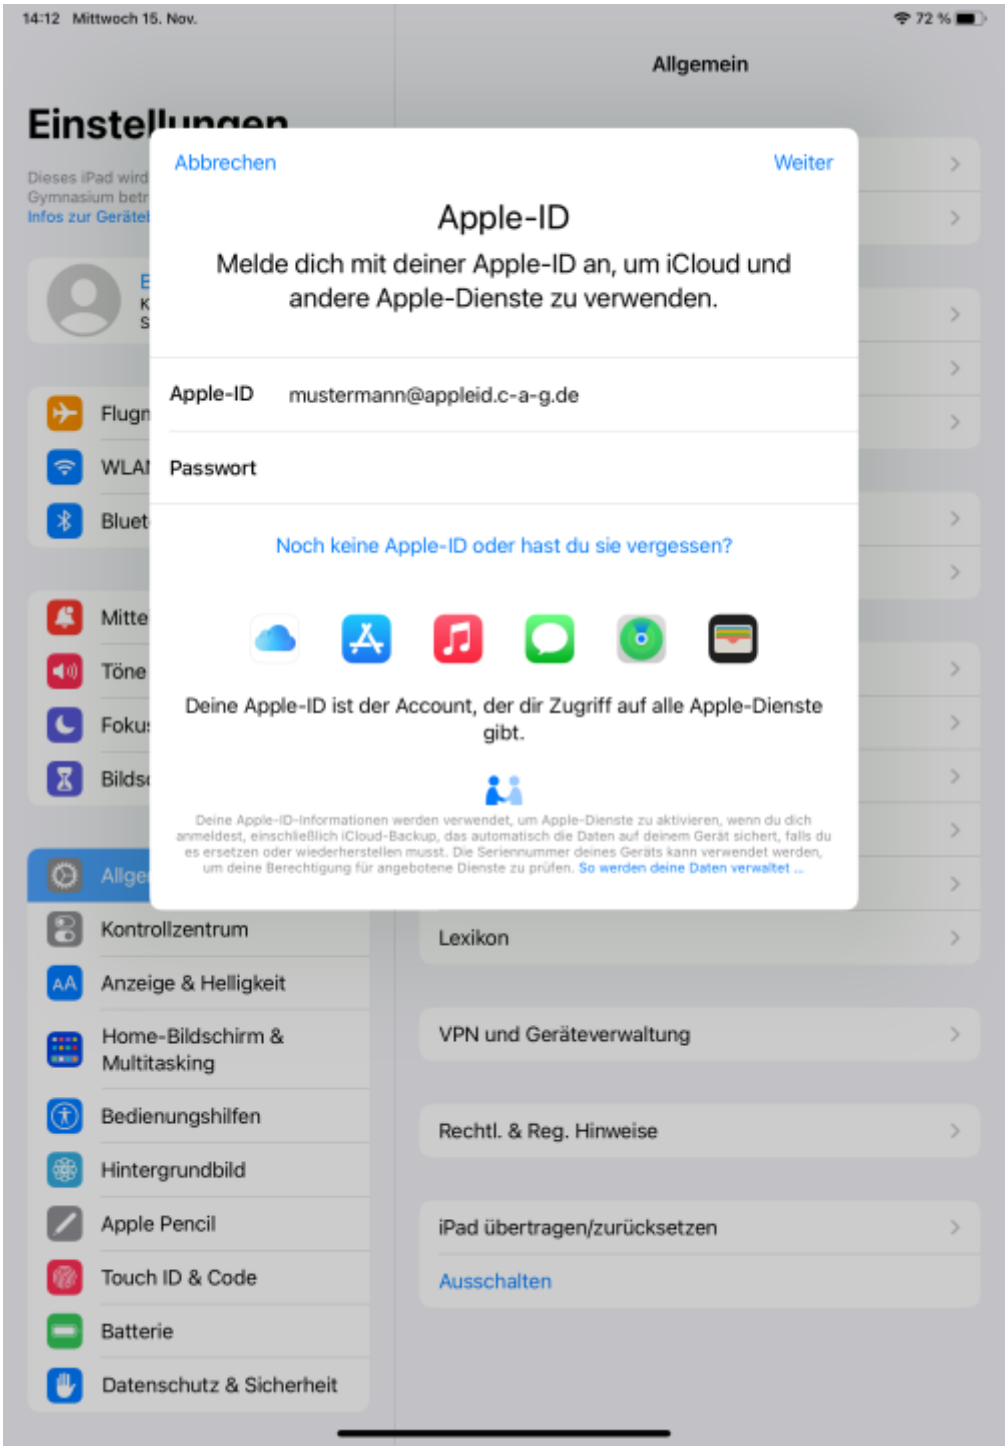

Enter the e-mail address provided by the school here:

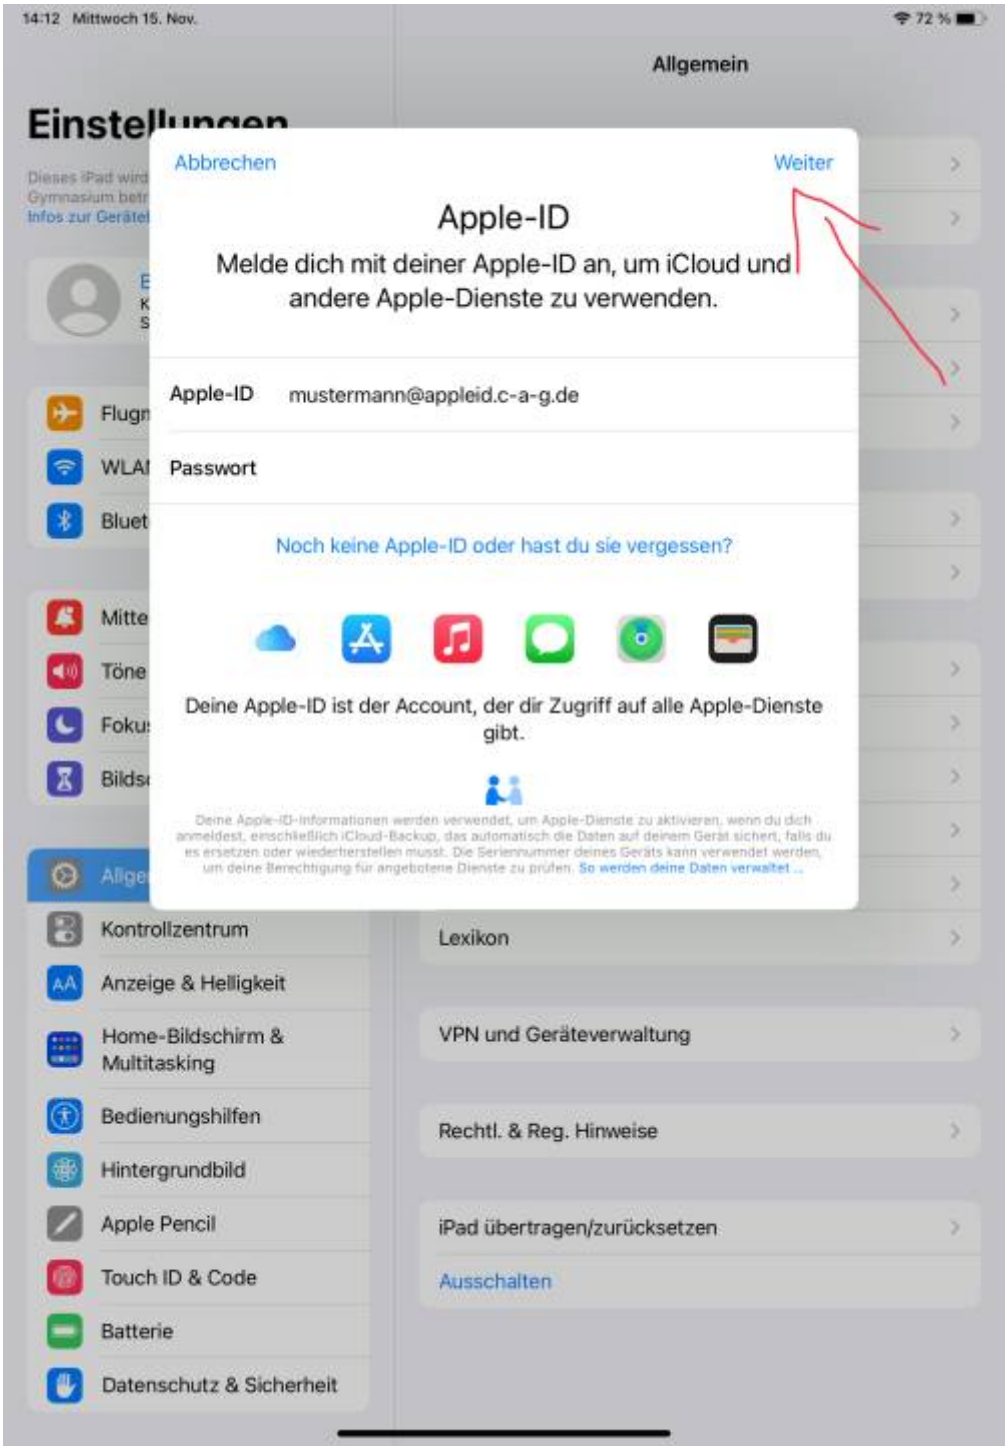

Then tap on next in the top right-hand corner.

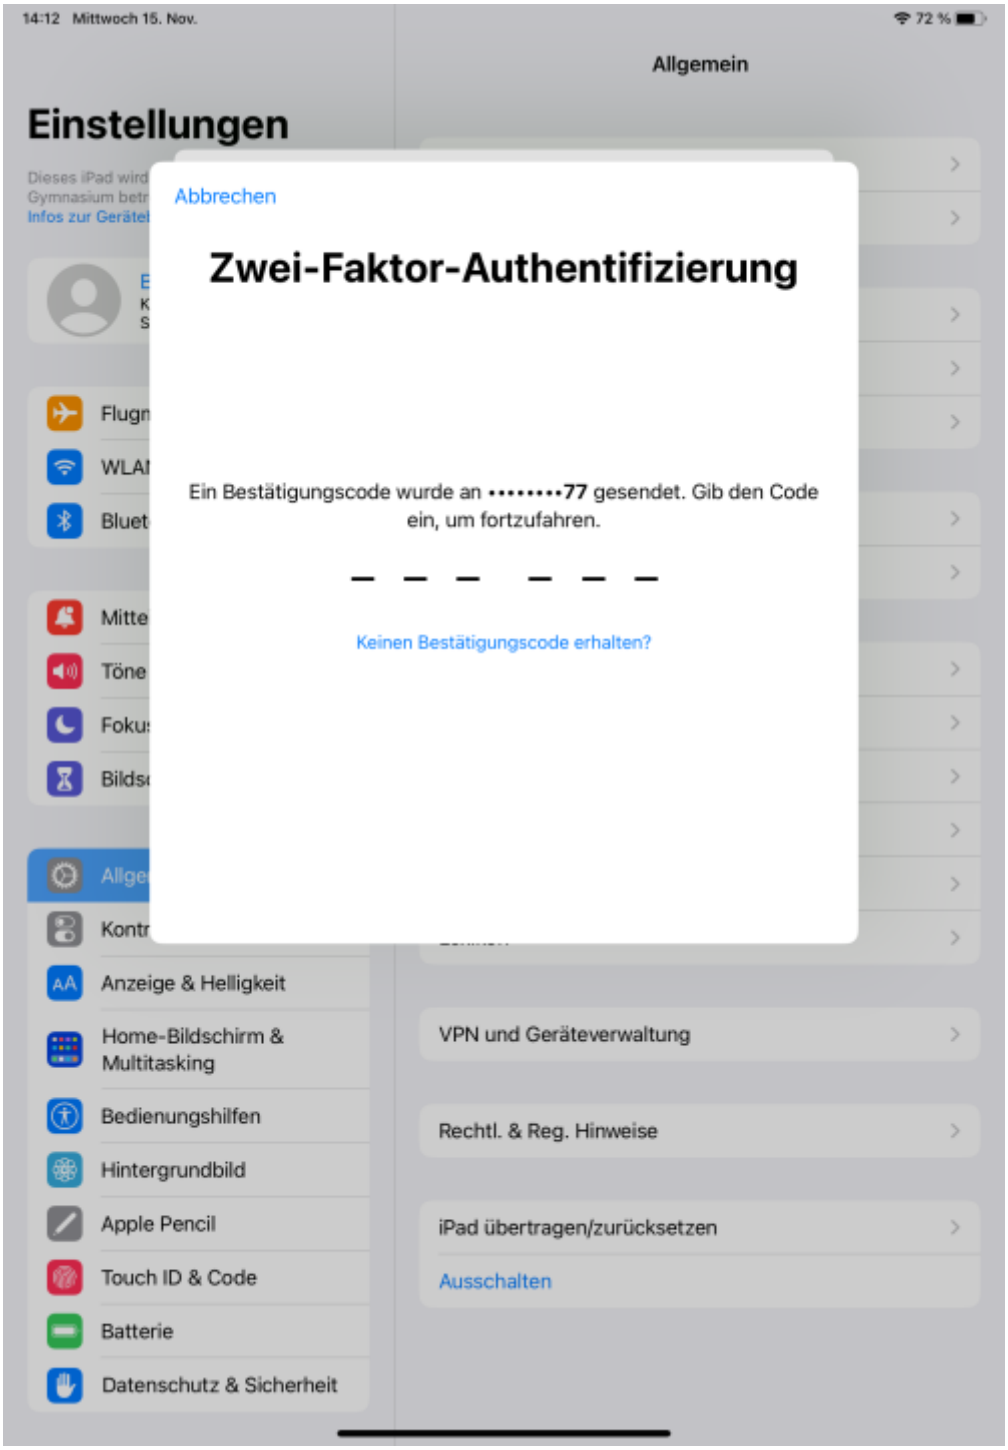

Enter the password you set at the end of step 1:

Then tap Next in the top right-hand corner.

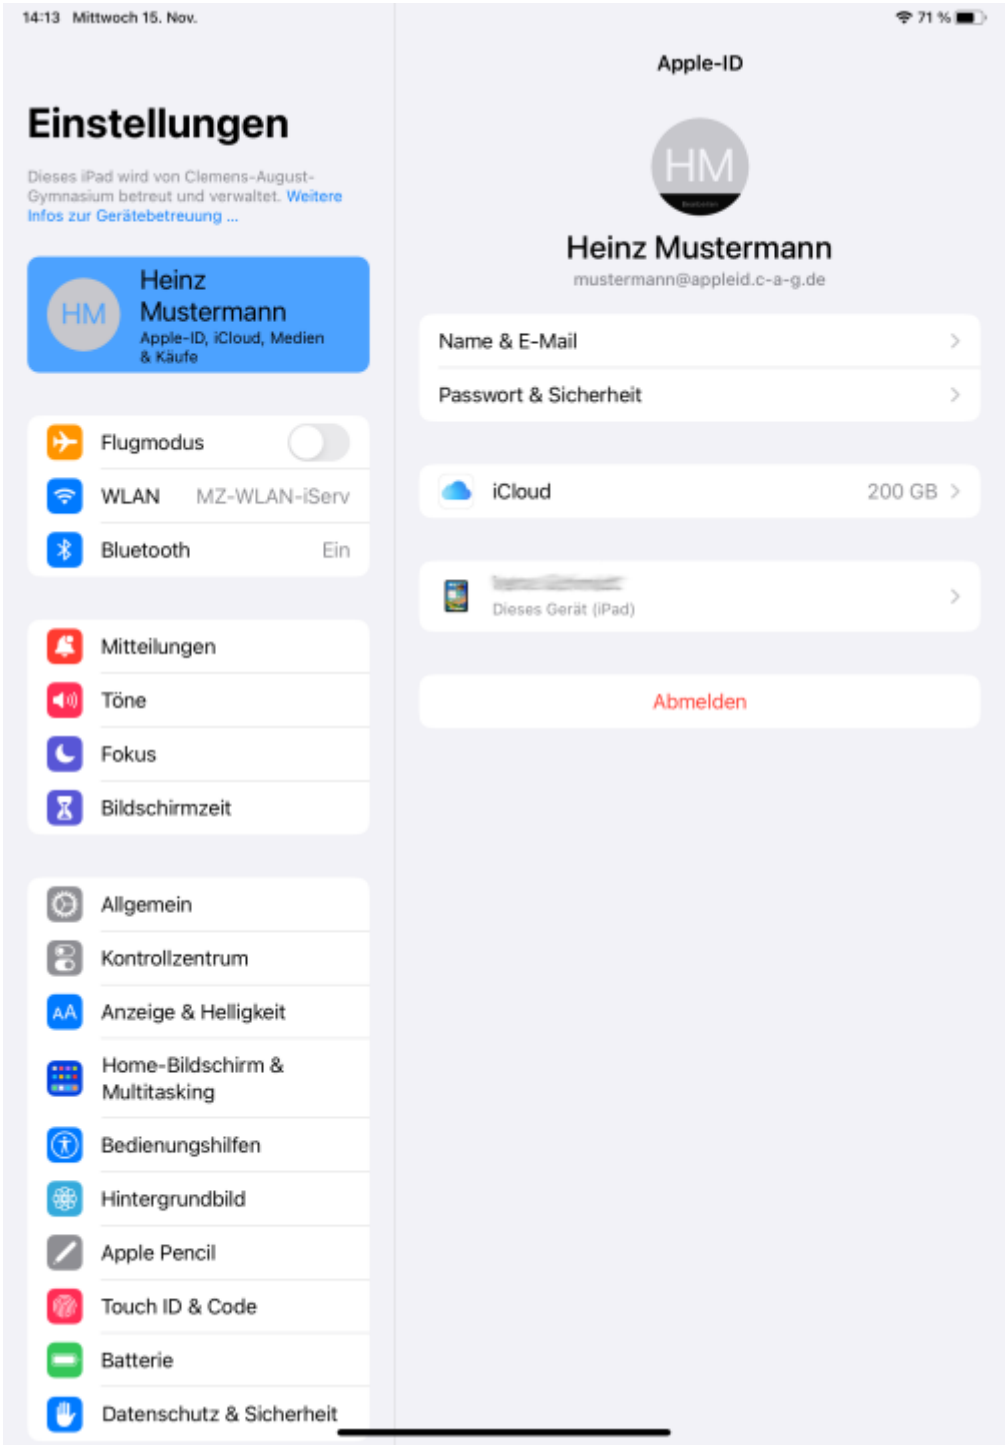

You will now be sent another code by text message to the mobile phone numb

Mobile phone number as 2nd factor

Because a second factor is required to log in, nobody can log in on another d
Apple ID, even if they have the access data. Access to the stored mobile pho

This completes the setup.

Now tap on the device name to set up backups for your iPad so that you can technical defects.
